

Chukwuemeka Maduekwe

Software Developer (TypeScript & Rust)

SUMMARY

As a Software Developer with expertise in building Desktop and Full stack Web applications using **TypeScript**, I have a passion for developing high-quality software.

I'm an excellent addition to any team thanks to my extensive freelancing experience and passion for open-source contribution, I have developed a knack for quickly adapting to new frameworks and technologies.

I am currently exploring **Rust** due to its impressive blend of performance, safety, and concurrency, which make it ideal for building highly reliable solutions.

FAVORITE TOOLS

- **Frontend:** Next.js, React, and Angular
- **UI:** Material-UI, SASS/SCSS, and CSS3
- **Backend:** Express (Node.js) and Mongo DB
- **Desktop:** Electron.js and Electron Forge

EXPERIENCE

Software Developer at Zenith bank April 2021 till date

- I apply my expertise as a developer to design and improve applications using different Frameworks and Libraries.
- My responsibilities include developing applications from the ground up and enhancing the functionality of existing ones through the addition of new features.
- I have a track record of successfully building scalable and efficient applications that cater to a diverse user base.

Software Developer (Freelancing) Oct 2018 – June 2021

- Worked on several projects across various domains, such as Fintech, Health, Sports, and Full-text Search, using a variety of frameworks and tools.
- Fixed bugs, improved SEO, and enhanced existing applications
- I take pride in overseeing the full lifecycle of application development while meeting deadlines in a timely fashion and exceeding clients' expectations.
- Working collaboratively with cross-functional teams and contributing to code reviews
