PROFESSIONAL SUMMARY

I'm a Software Developer with 5+ years in building high-quality Full-stack applications. With proven track record of both freelance and full-time work. I have a strong understanding of common patterns and conventions used in codebase thanks to my contribution to open-source projects.

SKILLS

- JavaScript Frameworks (Next.js and React.js)
- SEO Optimizations and Responsive Design
- Software Testing with Playwright
- SQL and NoSQL Databases (PostgreSQL and MongoDB)
- API design and development (Express.js and Node.js)
- Git and GitHub Proficiency
- UI libraries (Material UI and Tailwind)
- Technical Writing

WORK HISTORY

Software Developer at **Zenith Bank**
April 2021 till date

- Design and improve applications using different Frameworks and Libraries. Fixed bugs, and enhanced existing applications

- My responsibilities include developing applications from scratch and enhancing functionality of existing ones through addition of new features

- Successfully building and deploying scalable and efficient applications that cater to a diverse user base.

Software Developer (Freelancing)
October 2018 – March 2021

- Worked on several projects across various domains, such as Fintech, Health, Sports, and Full-text Search, using a variety of frameworks and tools

- Managed the full lifecycle of application development while meeting deadlines in a timely fashion and exceeding clients' expectations

- Working collaboratively with cross-functional teams and contributing to code reviews.

EDUCATION

Bachelor's Degree in Computer Science: October 2018

Abia State University, Uturu.
